EXPERIENTIAL | SELECTED WORK

As a creative director with a background in traditional architecture, I bring a unique combination of skills and experience to the design and creation of immersive spatial branded experiences.

My training as an architect has provided me with a strong foundation in design theory and technical skills, as well as an understanding of the construction process from concept development to production.

As a creative director I am well versed in managing interdisciplinary design teams, utilizing my strong leadership and communication abilities to bring together a diverse range of experts to achieve a common goal.

This understanding has given me the ability to approach projects with both a creative and a practical eye, ensuring that spatial environments are completed on time and within budget, while also meeting the highest standards of quality, creativity, and brand integrity.
